

# Supported SaaS Apps

## Support Levels

### Install

Electric will install application's desktop package via MDM at no additional cost

Electric can add compatible macOS applications to company's Self-Service portal to easily install themselves.

Other applications can be installed as a paid Professional Services engagement.

### Onboarding & Offboarding

Electric will perform user account provisioning and deprovisioning actions able to be requested through Turbine.

Actions may include user account creation, granting group and/or role-based permissions, deactivation, or removal. Electric performs these actions through an integration or manually within the application's Admin Center and following the software developer's guidance

### Administration

Electric will add, remove, and/or update settings for a user during a support request.

Administration will be limited to actions possible through the application's Admin Center following the software developer's guidance.

Company-wide changes or other requests may fall into a billable project handled by our Professional Services Team.

### Troubleshooting

Electric will provide support for a problem with a listed application to the best of our abilities following the software developer's guidance.

Troubleshooting may involve the use of remote control tools for the sole purpose of identifying and resolving an issue.

Electric will not set up or troubleshoot integrations, customizations, or workflows.

Application Name	Install	Onboarding & Offboarding	Administration	Troubleshooting
 15Five	N/A	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
